#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 11, 12, 14, 15, 16, 17, 18, 19 and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Geers (US 5999700).

Geers discloses a portable refrigerant tank heater system including a tank containing gas, a heater thermally attached to the tank for heating the tank, the heater having sufficient heating capacity to maintain pressure in the tank when gas is withdrawn from the tank; a power source with sufficient power to operate the heater; a sensor for providing a signal indicative of flow of gas from the tank; and a processor responsive to the sensor signal and communicating with the heater, the processor being configured to energize the heater with power from the power source when gas flows from the tank. It is noted that the use of the system at a remote oil industry site is just an intended use and does not serve to distinguish from the prior art. Further the use of the tank to contain propane or petroleum gas does not serve to distinguish.

***Allowable Subject Matter***

Claims 1, and 5-10 are allowed.

Claim 13 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Response to Arguments***

Applicant's arguments filed 11/23/2006 have been fully considered but they are not persuasive. Applicant admits that Geers controls onset of the heater based on a pressure differential. Since flow of gas would cause a pressure differential, it is the Examiner's opinion that the broadest interpretation of the claims is met by Geers.
